CAREER SUMMARY

Result-oriented DevOps Engineer with 1+ years of hands-on experience in Linux administration, cloud infrastructure (AWS), and automation. Certified in AWS and DevOps, with practical experience in CI/CD pipelines (Jenkins), Infrastructure-as-Code (Terraform), and containerization (Docker, Kubernetes). Strong problem-solving mindset, excellent communicator, and a dedicated team player passionate about how technology evolves. Detail-oriented, well-organized team player with strong verbal and written communication skills. Proactively seeks areas for improvement.

Work Experience:

System Admin & Security (Bitla software Pvt. Ltd (1 Year Exp *Mar-19-2025- At Present*))

- Linux (RHEL/Ubuntu),
- Windows,
- Active Directory,
- Barracuda Firewall,
- CrowdStrike, Zscaler.

Infrastructure Management: Administering a hybrid environment (Windows/Linux/Mac), ensuring 99.9% uptime through proactive troubleshooting and system patching.

Security Operations: Managed Barracuda Firewall and Zscaler URL filtering; deployed CrowdStrike endpoints to automate threat detection and response.

Identity & Access (IAM): Streamlined user lifecycle management via Active Directory and G-Suite, applying the principle of Least Privilege to all corporate accounts.

Automation: Utilizing Automated system maintenance and log monitoring using Bash and Python scripts, reducing manual effort by 40% and improving reliability and server log monitoring.

Network Operations: Configuring VPN Tunnels and managing DHCP/DNS settings to ensure secure and reliable remote connectivity.

TECHNICAL SKILLS

AWS

COMPUTE (EC2, AWS LAMBDA, EBS), **STORAGE** (S3, EFS), **NETWORKING** (VPC, API GATEWAY, ROUTE 53, CLOUDFRONT), **DATABASE** (RDS, DYNAMODB), **MONITORING** (CLOUD WATCH), **DEVELOPER** (CODECOMMIT, CODE DEPLOY) **CONTAINERS** (EKS, ECS).

LINUX

- Partitioning – LVM and RAID
- User and Group Management
- Package Management

DevOps TOOL's

- Git — GitHub (branching strategies, pull requests, code review workflows, merge management)
- DOCKER - Docker Hub (Docker Images, Docker Network)
- JENKINS - (Jenkins Master and Slave Using SSH) (Triggering)
- KUBERNETES - (Service Discovery and Load Balancing for Micro Services)
- TERRAFORM – (Cloud Infrastructure and Cloud Provisioning)
- PROMETHEUS - GRAFANA (Monitoring)
- CI/CD — Jenkins (Master/Slave), GitHub Actions (workflow automation), GitLab CI.

SCRIPTING

- Bash, Python,
- YAML,
- JSON,
- LVM/RAID Partitioning,
- Backup Strategies.

PROJECTS

Project Title: Serverless Web Application Development using AWS

Description: Built a serverless web application using AWS Amplify for hosting and deployment. Developed RESTful APIs with AWS API Gateway and AWS Lambda for backend logic. Utilized Amazon DynamoDB for scalable data storage and enforced security using AWS IAM policies for fine-grained access control. This solution enabled automatic scaling, reduced infrastructure management, and optimized operational costs. Finally, implemented a CI/CD deployment pipeline using AWS CodeDeploy to enable zero-downtime application releases.

Technologies Used: AWS Amplify, API Gateway, Lambda, DynamoDB, IAM, Code Deploy.

Project Title: Scalable Web Application with Auto Scaling, Serverless Functions, and High Availability on AWS

Description: We designed and deployed a scalable, highly available web application leveraging AWS EC2, Lambda, S3, RDS, VPC, and CloudWatch. The system automatically scales based on traffic demand, processes static and dynamic content efficiently, and ensures high availability through multi-AZ deployments. By utilizing EC2 instances for the application layer, Lambda for serverless computing tasks, and RDS for database management, we created a resilient architecture featuring real-time monitoring, automated backups, and secure networking. Additionally, the application leverages CloudFront for content delivery and Route 53 for DNS management, ensuring fast, reliable global service. Finally, we implemented a CI/CD deployment pipeline using AWS CodeDeploy to enable zero-downtime application releases

Technologies Used: AWS EC2, Lambda, S3, RDS, VPC, CloudWatch, Route 53, CloudFront, CodeDeploy.

TRAINING AND CERTIFICATES (From Dec 2025- Feb 2026)

- AWS CLOUD ASSOCIATE FROM BESANT TECHNOLOGY
- DEVOPS CERTIFICATE FROM BESANT TECHNOLOGY
- RED HAT LINUX ADMIN CERTIFICATE FROM BESANT TECHNOLOGY
- CCNA BY BESANT TECHNOLOGY
- ADVANCE EXCEL FROM BESANT TECHNOLOGY
- PYTHON FOR SCRIPTING FROM BESANT TECHNOLOGY

EDUCATION

- **B.E - ELECTRONICS AND COMMUNICATION ENGINEERING (2021-2024) - 7.71**
KNOWLEDGE INSTITUTE OF TECHNOLOGY, SALEM, TAMIL NADU
- **DIPLOMA (2018-2021)-84%**
MUTHAYAMMAL POLYTECHNIC INSTITUTE, SALEM, TAMIL NADU
- **SSLC (2017-2018)-76.6%**
JAYAM MATRIC HIGHER SECONDARY SCHOOL, SALEM, TAMIL NADU

PERSONAL INFORMATION

- Nationality: Indian
- Current Location: BTM Layout, Bangalore

• Language: Tamil, English
